## SUSTAINABLE DEVELOPMENT GOAL 10

### GOAL 10: REDUCED INEQUALITIES

Inequality threatens long-term social and economic development, harms poverty reduction and destroys people's sense of fulfillment and self-worth.

The incomes of the poorest 40 per cent of the population had been growing faster than the national average in most countries. But emerging yet inconclusive evidence suggests that COVID-19 may have put a dent in this positive trend of falling within-country inequality.

The pandemic has caused the largest rise in between-country inequality in three decades. Reducing both within- and between-country inequality requires equitable resource distribution, investing in education and skills development, implementing social protection measures, combating discrimination, supporting marginalized groups and fostering international cooperation for fair trade and financial systems.

### ACP Project | Report

**Empowering Differently Aabled Children: Advocacy, Engagement, and Empowerment through Social Interaction and Awareness**

#### Background and Need:

Differently abled children with attention deficit hyperactivity disorder and down syndrome frequently encounter major obstacles in their social, academic, and emotional lives. Their marginalization is exacerbated by society's ignorance and lack of empathy. Through direct support to families and these children at the Children's Library Complex in Lahore, this project aims to address these issues. In order to assist in integrating these children into society and highlighting their abilities rather than their disabilities, our efforts will be concentrated on social engagement, emotional support, and advocacy.

#### Aim:

To empower children with special needs by promoting social inclusion, offering assistance to their families, and standing up for their rights via events, public awareness campaigns, and sustainable development projects.

We aim to cover the following SDGs:

### The Book Bank

The "The Book Bank" initiative in government schools is designed to promote sustainable use of educational resources and reduce paper wastage by encouraging students to reuse and recycle textbooks. This initiative aims to lessen the environmental impact associated with paper production, decrease the financial burden on families and build a culture of sharing and sustainability within the school community.

### Objectives

- **Reduce Waste:** Minimize the environmental impact by reusing and recycling textbooks, decreasing demand for new paper.
- **Create a Sustainable System:** Establish an organized book exchange system within schools, which encourages ongoing reuse of academic materials.
- **Foster Community Engagement:** Encourage a culture of resourcefulness and community involvement among students, teachers, and staff.

**Students of FSHN arranged Entertainment nights to combat isolation in old age homes as a part of their ACP project**  
**Students of FSHN arranged Elders' compassion project: Offering support, engagement and gifts at old age home**
